

Mechanical and electrical engineering consultants

Healthcare

BCM Consulting Engineers staff have extensive experience in the development of NHS and Private Healthcare facilities.

LIFT Projects

Architects: P&HS, Pearce Bottomley, HDP

BCM are part of the Bluestone team providing Primary Health Care facilities for the LIFT projects in both Barnsley and Doncaster.

The LIFT projects are developed with the benefit of BCM's expertise in life cycle costing for Building Services.

Barnsley Tranche 1 projects are successfully operating at Goldthorpe, Thurnscoe and Worsborough. Tranche 2 are in design development.

Doncaster Tranche 1A projects are in construction at Thorne, Sandringham Road and Denaby.

Goldthorpe PCC
Architects: Pearce Bottomley

Broadway Medical Centre

Architects: Halliday Clark

BCM brought their LIFT expertise to Oakapple Primary Care's PCT project at Fleetwood.

This privately developed project shares similar philosophies to the LIFT projects where Life Cycle costing plays an integral part in the design process.

Communication with the numerous end users is a critical issue in ensuring that their wide ranging requirements can be successfully met.
